Research at East Coast Community Healthcare

Why we like research

Research helps us understand illnesses and how treatments work.

Research helps us answer questions about healthcare.

The information helps us decide on the best options for future healthcare.

Get involved!

- ✓ Taking part in research can be really **rewarding**.
- ✓ Being part of a study can help you **learn more** about your own health.

Types of research

We can find out more in lots of ways.

Drug studies

We look at how medicines work.

Questionnaires

We ask questions to find out what people think and feel.

New services

We try out any new ideas to see how well they work.

Interviews

We talk to people to find out what they have experienced.

Being asked to take part

Anyone who helps with your health and who is trained might ask you about taking part in research.

If a team are running a research study they will know who they can ask to be part of it.

Saying “no”

You can always say “No” or change your mind about taking part.

This won't change anything about the care you normally have.
